

## Lifestyle Q&A

**Q:** Is it possible to enjoy the digital music from the internet or stored on my computer / iPod throughout my existing house or office?

**A:** There are a multitude of options for providing flexible music listening of various music sources across the house or an office space. Music sources across the house can include no cost music services such as Pandora, Rhapsody or your own personal CDs or song downloads. The challenge is determining how to zone the physical space where desired music listening exists, placement of speakers to provide an aesthetic look while achieving nice sound quality, and easy to use products controlling the playback of a range of music sources. How about controlling the music system from your iPhone, wireless handheld controller, or in-wall keypad? Give Digital Innovations a call for a no cost consultation for your audio/video, security, and smart home needs! Innovative Solutions. Reliability. Great Installation & Service. That's the Value of Digital Innovations.....

## Featured Product

The vertically aligned Pronto TSU9400 compiles all of your remotes into one that handles just like a classic remote control – just with tons more functionality. You can control it all: your home entertainment system, the lights in the living room, and your digital music collection on your PC... So whether it's for a multi-room solution or total home control, the Pronto TSU9400 is made to match the way you want to control.

## Tip & Trick

Netflix is now available for easy viewing on TV through Windows Media Center. Here you have access to 12,000-plus movies and TV episodes for watching instantly on a TV connected to a Media Center. You can do pretty much anything you can do through Netflix's own PC interface – browse "watch instantly" content, manage your online and DVD movie queues, or search by genre.
